Mike, I know that some are broken on www that still have the long paths but they were not used enough to create a redirect.

Subject: Please move *.conf files to snapshot

Hi.

Judy is uncovering broken links on snapshot.epa.gov that aren't covered by the redirects LeAnn just added.

Like this page, https://snapshot.epa.gov/ghgreporting/forms/contact-us-about-ghg-reporting_.html -> all of the bulleted URLs are broken, as is the EPA's Media Contacts link. That's because they're pointing to various URLs, like /climatechange/, and redirects that are handled in the *.conf files on www.

E.g.,

<https://snapshot.epa.gov/climatechange/science/index.html> is 404
<https://www.epa.gov/climatechange/science/index.html> redirects to <https://www.epa.gov/climate-change-science> because of the *.conf redirect.

<https://snapshot.epa.gov/climatechange/policy/index.html> is 404
<https://www.epa.gov/climatechange/policy/index.html> is also 404 ... So whatever.

<https://snapshot.epa.gov/climatechange/ghgemissions/index.html> is 404
<https://www.epa.gov/climatechange/ghgemissions/index.html> is also 404. Hmm.

<https://snapshot.epa.gov/climatechange/effects/index.html> is 404. So is
<https://www.epa.gov/climatechange/effects/index.html>

<https://snapshot.epa.gov/climatechange/wycd/index.html> is 404
<https://www.epa.gov/climatechange/wycd/index.html> redirects to <https://www.epa.gov/climatechange/what-you-can-do-about-climate-change> because of the *.conf redirect.

So Judy, we can take care of some of these broken snapshot links, but others are just plumb broken on www.

~Mike
